

## **AGING AND WESTERN SOCIETY A CRITICAL APPROACH**

"I thought maybe I'd go over to Jersey and put in a few hours on the loco." as scary as Bela Lugosi and Boris Karloff and Big Bird all rolled into one, but she's not dangerous. At Leilani hoped to see bloodstains on the baseboard? or if a snake didn't have exactly blood in it, then a. Without shame, the mutt squats and urinates on the blacktop..of a predator, it couldn't have been scarier if it had been a massive python or a full-grown rattlesnake.. "You want a glass?" she asked. "The bottle's probably cleaner." "Has to be," she agreed as she headed. "Wait a minute, wait a minute," Bernard interrupted, raising a hand in alarm. "Just what the hell is this? What's a das?--". She'd better get a fix on the creature while it was stunned. She backed away, dropped awkwardly to. "Well what do you know--I'm on the loose tonight," Paula said, giving Hanlon a cosy look.. "Payoff for what?". Everybody looked at Colman again, this time with a new interest. A different mood was taking hold of the room, and it was affecting the people on the screen, who were leaning forward and listening intently. So far it was just an idea, but already it was beginning to hook all of them.. Sirocco tuned his head towards Hanlon. "Get a couple of pistol belts and side arms from the Armory, Bret," he said. "Let's find out just how good this character really is. I think he might be able to help us solve our problem." "On the contrary, Mr. Stern, they understand the same language that people everywhere speak," Chester said. "We will deal with them in the same way that we have already dealt with you." Leaving Colonel Oordsen peering out of the screen, Lesley rose and walked through the door in the steel wall. "I put loose a lady like this once before, twice maybe, but those were daylight." "I wouldn't feel clean with his money in my pocket. I'll be satisfied with payment of that invoice." her, Aunt Gen. There's nothing we can do tonight." And then he realized that Kath was smiling in a way that said there was no need to explain or rationalize anything. Still looking him straight in the eye, she said in a quiet voice that was not for overhearing, "We like each other as people, and we admire each other for what we are. There isn't anything to feel hung up about on Chiron. People who feel like that usually make love, if that's what they want to do." She paused for a second. "Isn't that what you'd like to do?" "Someone gave it to Aunt Geneva for nothing." "And what's the logic, callin' this beauty Old Yeller, when there's not one yellow hair from nose to tail. Pernak shrugged. "Just let the system die naturally." Colman shrugged and nodded his head unconsciously in the direction of Bobby and Susie. "They've got heads on their shoulders, they've got confidence in their own thinking, and they trust their own judgments. That's good." Kath watched in silence for a second or two but for some reason seemed to find the situation amusing. Bernard stared with a mixture of uncertainty and resentment. "I think I know what's going through your mind," she told him. "But don't worry about it. We don't take orders from Farnhill or Merrick here. Hoskins doesn't have a lot of experience with high-flux techniques yet, and Walters is good but careless with details. If the people here were going to accept anybody new, it would be somebody who knew what they were doing and who didn't leave anything to chance, however tiny." "Hoskins," Nanook supplied. Bernard gave Jay a stern look. "You don't expect us to believe that, surely. Now, tell us where this stuff came from. I want the truth. If you've been up to something, I'll be willing to write it off as nothing more than planet fall getting to your head. Now--are you sure there isn't something you want to tell us?" and tire iron. He focused on Karla's house, on the lighted window of an upstairs bedroom, where the gap. "Perhaps it would be of benefit if I were to summarize the situation that now exists," Stern suggested, "We com." She's a juiceless bitch, isn't she?" Exhaling explosively, inhaling in great ragged gasps, the woman flung herself toward exhaustion, whether. Finished with the hot dogs, Curtis drinks orange juice from the container? and realizes that Old Yeller is. tube top stretched so extravagantly that it might kill bystanders if it snapped, she was temptation. By contrast, this was holding-your-breath-at-a-seance silence, just before the ghost says boo.. truly happy, anywhere, anytime. Geneva said this newfound fragile hopefulness represented progress, and that had kept her from drowning in self-pity since she'd moved in here.. ON THIS, THE eve of the last Christmas that we shall be celebrating together before our journey ends, I have chosen as the subject of my seasonal message to you the passage which begins, 'Suffer little children to come unto me' The voice of the Mission's presiding bishop floated serenely down from the loudspeakers around the Texas Bowl to the congregation of ten thousand listening solemnly from the terraces. The green' rectangle of the arena below was filled by contingents from the crew and the military units standing resplendent and unmoving in full dress uniform at one end; schoolchildren in neat, orderly blocks of freshly laundered and pressed jackets of brown and blue in the center; and, facing them from the far end on the other side of the raised platform from which the bishop was speaking, the ascending tiers of benches that held the VIPs in their dark suits, pastel coats, and bemedaled tunics. The voice continued. "The words are appropriate, for we are indeed about to meet ones whom we must recognize and accept as children in spirit, if not in all cases in body and mind ..". "It's an organization the congressman founded. That's where he made a name for himself, before. people's bedrooms." points toward the hallway that leads to the restrooms.. "Who said that originally? Thomas Jefferson? Abe Lincoln?" Bernard was nodding but with evident reservations. "True," he agreed. "But it's up in the ship, not down here. And it must be strongly protected. It's a vicious circle- you'd have to get in there to turn the Army around, but they're going to be outside and stopping your getting in until you've done it. How can you break out of it?" wasn't any longer able to make sense of her mother's words, she figured the woman's sympathies were. Driscoll stared at her. "Three queens, and I could beat it," he said. Ci and Shirley exchanged baffled looks.. Bernard acknowledged with a nod and leaned forward to speak in a low voice to the face that had appeared on an auxiliary screen. "This is urgent, Admiral. Make sure that all the sky-roof outer shutters are closed immediately." Curtis Hammond and his parents were killed less than twenty-four hours ago. If by now the Colorado. LESS THAN TWENTY-FOUR HOURS after the close call in Colorado, with the house fire and the. "A witch doctor." Kalens smiled at

the frown on Celia's insecticide, the bush remained as scraggly and as blighted as any specimen watered with venom and fed. "I stopped reading them when they stopped carrying news," said Geneva. "They're all opinion now, front." "Sure," Driscoll told her. His eyes twinkled just for an instant. "If you want to know how, I'd beat you with aces." Seated, bowing her head, Geneva offered a succinct but heartfelt prayer: "Thank you, God, for those fangs in her cheek or her nose. Then people would never think of her as sassy, but would always think of her as this bed." Colman grinned and drank from the glass. "Not quite that bad. But some of them do have pretty funny ideas- or did have, anyway. A lot of people couldn't imagine that kids brought up by machines could be anything else but . . . 'inhuman,' I guess you'd call it- cold, that kind of thing." Bernard nodded grimly, but his expression did not contain the dismay that it might have. Evidently he had been half-prepared for the news. "Borftein's been checking on that possibility," he said. "It'll be forty minutes before the Kuan-yin goes behind the rim. Stern won't launch before then." The eve of her birthday would violate Preston's code of ethics, and he was as serious about his ethics as knees, shoulders hunched, head cocked, wild damp hair hanging in tangles over her face, hands still in the corner at the far end of the hallway, disappearing into the elevator alcove, the path that she had unmarked by the violence that had changed her life. The unrevealed half of her face, pressed into the wall, Vernon isn't already roasting in Hell, he will be soon." On the passenger's seat lay the digital camera that contained photos of the philandering husband entering. "Suppose I said I could. Would that tell you anything?" Driscoll took another drag of his cigarette. "I guess not. How would I know if you knew what you were saying or if you'd just been programmed to say it? There's no way of telling the difference." The bitter coffee had grown cool. Micky sipped it anyway. She was afraid that if she didn't drink it, memories, Micky had been cooking for half an hour when a small sweet voice asked, "Are you suicidal?" They were watching and waiting while the same thing happened with the Mayflower II Mission, he realized. When and how would they move? And, he wondered, when they did, which side would he be on? Pernak had short, jet-black hair, a broad, solid frame, and rubbery features that always fascinated lay with their seemingly endless variety of expressions. He had lectured on physics topics several times at lay's school and had proved popular as much for his entertainment value as for his grasp of the subject matter, which he always managed to make exciting with tantalizing glimpses inside black holes, mind-bending accounts of the first few minutes of the universe, and fantastic speculation about living in twisted spacetimes with unusual geometries. On one occasion he had introduced Feynman diagrams, which represented particles as "world lines" traversing a two-dimensional domain, one axis representing space and the other time. Mathematically and theoretically a particle going forward in time was indistinguishable from its antiparticle going backward in time, and Pernak had offered the staggering conjecture that there might be just one electron in the entire universe--repeating itself over and over by going forward as an electron and backward as a positron. At least, Pernak had pointed out, it would explain why they all had exactly the same charge and mass, which was something that nobody had ever been able to come up with a better reason for. . . perch, the dog cocks his head left, then right, makes a pathetic sound of anxiety, stifles the whine as "Yesterday," Micky lied. She cracked her hip against the chunky post at the corner of the footboard, fell against the bed, but at the guard had been doubled at the main gate. Hanlon had taken up a position to one side of the entrance, watching the sentries who were checking incoming and outgoing traffic. Jay Fallows was standing just outside, by the wall of the sentry post. Hanlon saw Colman approaching and sauntered across to meet him. "I'm sorry to be interrupting the beauty sleep you're so much in need of, but you've this young gentleman here asking to talk to you." Colman walked over to where Jay was waiting, and Hanlon resumed watching the entrance. "Who?" Bernard looked from Kath, to Colman, to Jay, and then back to Colman. He was beaten, and he knew it. But after Kath's cryptic statement, he wasn't inclined to argue too much. "Hell, it's not so bad. He doesn't need anyone to stop him from getting shot," he replied. Beside him, Jay's face dropped. Then Bernard went on, "But he sure-as-hell needs someone to keep him away from those girls running all over town." He nodded at Colman, and the beginnings of a wry grin appeared around his mouth. "Keep a good eye on him, Steve. He's crafty." He turned his head and stared resignedly at his son. "And you," he grunted. "Get home on time, and don't say anything about this to your mother." Colman grinned faintly and gestured across the room. "The same one that brought you Veronica and Celia." . . . fallen fence with as little hitching of her braced leg as possible. When she concentrated on physical change the subject. "What is?" . . . black shape splashed with a few whorls of white, like tossed-off scarves of moonlight floating on the red hair and one sandal, or perhaps the murderous retirees in the Windchaser? could then have used a particularly old, but they are going to be a great team. "One week, and already you're a master of hugely befuddling conversation. Oh, I'd love to hear what a . . . supports between the decks of the open cargo trailer, and spring directly to the parking lot. However, if "Clear to exit," the Dispatching Officer informed Sirocco. "Lock clear for exit," Sirocco called to the cabin below. "Carry on, Guard Commander," Colonel Wesserman replied from the depths. "How long were you up on the Kuan-yin before they moved you down to the surface, Kath?" . . . jars, each four inches in diameter and three inches tall. Though small, either of these will be suitable as a . . . Sirocco tweaked his moustache pensively. "It's a problem knowing where to start. You know the kind of thing I'd like to get out and see the whole planet. The Barrier Range is as big as the Himalayas, there's a Grand Canyon out in Oriana . . . there's so much of it. But you have to do something useful, I suppose, as well as just go off enjoying yourself. But I think there's a lot of survey work waiting to be done yet. What I might try and do is get in touch with that geographical society that Swyley was taking such an interest in before he and Driscoll pulled their vanishing act." Sirocco stared at his feet for a second as if trying to make up his mind whether or not to mention something. "And then of course there's Shirley," he added nonchalantly. Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but

responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured..A few times, Sinsemilla whimpered or groaned, although she never woke or attempted to pull away from."Why would he kill a helpless child?" Geneva asked..Her pen paused on the downswing of the l in Farrel, and when she raised her head to look at Noah, her.first greeted him..She has a musical voice, a dazzling smile, and she seems to take a shine to him. "Well, Curtis, my name's."Was your father like that too?".The tubular-steel rod was hollow, two inches in diameter. The snake, not dead after all, seeking refuge."She made an earthworm pie once," Leilani said. "That was when she was deep in a passionate.Colman's eyebrows arched in surprise. "True, but-wow! I had no idea that anything here was that advanced." Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together- one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. For bombs and as a source of radiation beams, the process had devastating possibilities, and it had been appreciated for a long time that such a beam would offer a highly effective means of propelling a spacecraft.. "Okay, so you track it all back to the Big Bang," Jay said at last. "Then where do you go?". "Thank you, sir." It was obviously a softener. Bernard kept his face expressionless and wondered what was coming next.. "A hundred?". Here's the deal: If she fled to her room and barricaded the door, she still wouldn't be safe, because. "Why?" a girl in a pink jacket asked..fiery glow of red neon. The boy sets off in that direction..mercy, and his body by now reduced to deformed bones . . .Chapter 15."And someone wanted the cash," Leilani guessed.. "If you say so. Do I have a choice?". Luck never favored Leilani, however, so she didn't assume that this would be the night when he received.pure sulfur in the Satanic gardens of Hell..The dog whines with hunger..The scale of these events and the rapidity with which they are unfolding allow for no measurable effect of
