Here I am exposing myself in front of you, and you come back with *No Opinion.' I don't buy that."..Colman frowned to himself as his mind raced over the data's significance. No sane attacking force would contemplate taking an objective like that by a direct frontal assault in the center--the lowermost stretch of the trail was too well covered by overlooking slopes, and there would be no way back if the attack bogged down. That was what the enemy commander would have thought anyone would have thought. So what would be the point of tying up lots of men to defend a point that would never be attacked? According to the book, the correct way to attack the bunker would be along the stream from above or by crossing the stream below and coming down from the spur on the far side. So the other side was concentrating at points above both of the obvious assault routes and setting themselves up to ambush whichever attack should materialize. Again Amos began to whisper through the bars, and Jack smiled and nodded..It was painful to leave the mystery for later, but there was nothing to be done about it. They could not bring themselves to uproot the thing, even when five more like it sprouted in the graveyard. There was a new consensus among them to leave the Martian plants and animals alone. Like nervous atheists, most of them didn't believe Song's theories but had an uneasy feeling of trespassing when they went through the gardens. They felt subconsciously that it might be better to leave them alone in case they turned out to be private property.."And that?" asked Amos, pointing to the trunk..- I. G. Saltier.my calls." She lowered her eyelids demurely. "I was a Goldwyn Girl, you know."
