

## THE ENJOYMENT OF MUSIC

These are not rich people, and he feels guilty about taking their money. One day, if he lives long enough, GENEROUS SLICES of homemade apple pie. Simple white plates bought at Sears. Yellow plastic. "Coffee?" Geneva inquired. "I know, but I figured rd go take a 16ok at the place anyhow out of curiosity. That can't do any harm. Later on, well... maybe anything could happen." the crushed blades under him, and scrambles at once to his feet..as if satisfied that everything was now clear. It wasn't. "Why? What happens with them?" Bernard asked. Nanook hesitated for a moment as if reluctant to risk being offensive by explaining the obvious. He shrugged. "Well . . . usually somebody ends up shooting them," he replied. "So it never gets to be .a real problem."..by the thousands, by the millions. Rumbling-growling-wheezing-panting, each big truck waits for its.place mats from Wal-Mart. The homey glow of three unscented candles that had been acquired with.get high. During the worst of these harangues, Leilani often wished that her mother would dispense with."Of course, dear." Geneva poured from a glass pitcher that dripped icy condensation..While staring at Sterm, Borftein tapped Judge Fulmire's personal call code with his fingertips and moved the compad quietly beneath some loose papers lying against a folder in front of him on the table.."Deleted," the machine confirmed. "Last line of entry reads: "... shut up behind a fence, ignored, and looking ridiculous."..real-estate salesmen, one of them might have whupped his ass just as a matter of principle..away with the spring of pride in her step.."I second the motion," a voice called out promptly..Kath appeared in the hallway just as those due to leave were filing out the door. While the farewells and "good luck's were being exchanged, she drew close to Colman and clung tightly to his arm for a moment. "Come back," she whispered..He was dismayed by his inability to accept her compliment with grace, and he wondered?though not..Leilani winced. "Unfair. You know that's one of my sore points." "No sore points. No points at all,".with death. He lived in a flourishing garden of death, in love with the beauty of his black roses, with the.-"Maybe we shouldn't rush things too much," Bernard suggested. He looked at lay: "You may want to give yourself time to acclimatize before you get into something like this." His tone said that he was being tactful in his phrasing; lay wasn't going. For the moment, at least, lay didn't feel inclined to argue too much..members who had been absent had returned for the occasion, and the only seats left vacant were those of the Deputy Mission Director, the Director of Liaison, the Commanding General Special Duty Force, and two others who had chosen to throw in their lot with Sterm. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds..Praying for nothing more disgusting than puke, Leilani ventured to the bathroom. This cramped,.Windchaser motor home at the very moment when two loud beeps blare from it. The headlights flash.."Then you lose out to the system. It's like playing against Driscoll-the system makes it's own aces."..he feels his way with outstretched hands to guard against surprises..Ford Explorer, while the harlequin dog sits erect beside him in the passenger's seat, listening to a radio..Farnhill looked uneasy and seemed a trifle awkward. "Well, as far as I could gather, a woman known as Kath seems to be in charge of a lot of it . . . as much as anybody's in charge of anything in this place. I haven't actually met her though."..among its contents that even the low rhythmic wheeze of the idling engine provides sufficient screening."Now you're in a gang with a future." "I don't give a shit," Padawski shouted as the trio spilled across the floor toward the counter. "I don't give a goddamn shit, I tell ya. If that asshole wants to--" His voice broke off suddenly. "Say, who've we got over here? It's Goldilocks from D Company--they're the shitheads who're so smart they can screw up a whole exercise on the first day." Colman felt the floor vibrate as heavy footfalls approached the booth. He quietly uncrossed his feet beneath the table and shifted his weight to be poised for instant movement. His fingers curled more snugly around the half-full cup of hot coffee. He looked up to find Padawski leering down from about three feet away.."Gut-feel," Pernak told him "The weapons have to exist. I tell you, I know how these people's minds work."..your head, just like in mine. You sort of hide it, but I can see." "Ah. Then I'm not embarrassed, just slightly sickened. Why don't you get a glass of cold lemonade,.,Curtis had thought he was being pursued by a platoon. Perhaps it is instead an army. And the enemies of..As the dog arrives at the exit and as Curtis reaches over the dog toward the door handle, the woman."That's exactly what they are," Pernak said. "In the material sense, anyway. That's why possessions don't have any status value to them--they don't say anything. That's why you won't find any absolute leaders down there either." "How come?" Lechat asked, puzzled..All rights reserved. Copyright 2001 by Dean Koontz."There won't be a war on Chiron, will there?" Marie asked..Sterm studied the view in silence. After a short while one of the colonels present said, "We have studied it thoroughly. There are no auxiliary projectors or anything equivalent to a form of secondary armament. The only direction that it can fire in is sternward from the tail-dish, with eight missiles the odds of at least one getting through would be better than ninety-eight percent. With sixteen the chances of failure are about as near zero as you can get."..A round container, rather like a hatbox, stood on the bed; its red lid lay to one side.."If you don't mind my saying so, isn't this a bit risky, sir?" Driscoll said apprehensively. "I mean . . . with all this going on? Suppose Colonel Wesserman or somebody shows up."..breathing. Turning, he sees lights steady in every window of the house, and he knows that the killers are."I

told you once already, it's none of your business anymore. Leave me alone. I don't want to talk to you. Just-go away and leave me alone.".She wasn't an alcoholic, after all. She didn't drink or feel the need to drink every day. Stress and. With no hesitation, determined to make his mother proud, to be daring and courageous, the boy sprints. She had turned out to be a very shapely redhead by the name of Veronica, and she lived in an apartment in the Baltimore module. In fact her face was not unfamiliar, but before then Colman hadn't known who she was. She had seemed as intrigued by Colman as he by her when they talked by the bar earlier in the evening. "Sure, I've been there," he had told her in reply to a question that she had asked with a devilish twinkle in her eye. "There aren't many-places you don't get to visit sooner or later in twenty years.".Colman nodded. "Sure. They're selected and trained to obey orders and not ask questions. Some of them would shoot their own mothers if the right person said so. And Stormbel was in on it. It fits." He thought for a second longer, and then looked at Lechat and Bernard. "There were a lot of suspicious things about Padawski breaking out too. It couldn't have happened the way it did without inside help. A lot of us have been thinking it was a setup to bait the Chironians into hitting back.".Jay nodded and smiled. "You're right. We did.".But Colman felt that he did belong here--among the machines. He understood them and talked their language, and they talked his. They were talking to him now in the vibrations coming through his suit. The language of the machines was plain and direct. It had no inverted logic or double meanings. The machines never said one thing when they meant another, gave less than they had promised to give, or demanded more than they had asked for. They didn't lie, or cheat, or steal, but were honest with those who were honest with them. Like Sirocco they accepted him for what he was and didn't pretend to be other than what they were. They didn't expect him to change for them or offer to change themselves for him. Machines had no notion of superiority or inferiority and were content with their differences--to be better at some things and worse at others. They could understand that and accept it. Why, Colman wondered, couldn't people?."You want a glass?" she asked. "The bottle's probably cleaner." "Has to be," she agreed as she headed.Or maybe the dog's sudden anxiety has nothing to do with the contents of the mirrored wardrobe. She.see clearly in herself..That depends, ma'am. They can lead to a heap of trouble.".Jay frowned and looked mildly uncomfortable. "Sex?" he hazarded..Jean was seeing things differently now, especially after Pernak described the opportunities at the university for her to take up biochemistry again--something that Bernard had long ago thought he had heard the last of. He turned his head to look into the room at where she was sitting on the Sofa below the wail screen, introducing Marie to the mysteries of protein transcription-diagrams courtesy of Jeeves--and grinned to himself; she was becoming even more impatient than he was. Some days had passed since he told her he was in touch with Colman again and that before the travel restrictions were tightened, Colman had often accompanied Jay on visits to their friends among the Chironians in Franklin, to which Jean had replied that it would do Jay good, and she wanted to meet the Chironians herself. Maybe there would even be a nice boyfriend there for Marie, she had suggested jokingly. "A nice one," she had added in response to Bernard's astonished look. But you can get vitamin D in tuna, eggs, and dairy products. That's better than too..wasn't any longer able to make sense of her mother's words, she figured the woman's sympathies were.Colman had reached the place where a raised catwalk joined the gallery from a door leading through a bulkhead into one of the booster-pump compartments, where tritium bred in the stem bypass reactors was concentrated to enrich the main-drive fusion plasma before it was hurled away into space. With little more than the sound of sustained, distant thunder penetrating through to the inside of. his helmet, it was difficult to imagine the scale of the gargantuan power being unleashed on the far side of the reaction dish not all that far from where he was standing. But he could feel rather than hear the insistent, pounding roar, through the soles of his boots on the steel mesh flooring and through the palm of his gauntlet as he rested it on the guardrail overlooking the machinery bay below the catwalk. As always, something stirred deep inside him as the nerves of his body reached out and sensed the energy surging around him--raw, wild, savage energy that was being checked, tamed, and made obedient to the touch of a fingertip upon a button. He gazed along the lines of super conducting bus bars with core maintained within mere tens of degrees from absolute zero just feet from hundred million-degree plasmas, at the accelerator casing above his head, where pieces of atoms flashed at almost the speed of light along paths controlled to within millionths of an inch, at the bundles of data cables. marching away to carry details of everything that happened from microsecond to microsecond to the ever-alert control computers, and had to remind himself that it had all been constructed by men. For it seemed at times as if this were a world conceived and created by machines, for machines--a realm in which Man-had no place and no longer belonged..By your customs," the Chironian observed..Veronica nodded her head quickly a couple of times. "She's not hurt or anything like that, but she's in a lot, of trouble. She's gotten herself mixed up with Sterm, and she can't make a move without being watched. She could be in real danger, Steve. She has to get away from there.".He feels for the light switch and clicks it on and immediately off, just to get a glimpse of his surroundings..Classified information," Colman murmured. Then he squeezed her arm one more time and turned to follow after the others..What're you doin' here, boy?..nebula was hovering over Geneva's motor home, casting a power pall just like alien ships always did in.The boy almost corrects her on two counts. First, Old Yeller in this case is a she, not a he. Second, the."Aha" Merrick seemed more satisfied. "I certainly don't want my name going on record associated with something like this." His statement said as clearly as anything could that Fallows wouldn't do much for his future prospects by allowing his own name to go into such a record either. Merrick screwed his face up as if. he were experiencing a sour taste. "Low-echelon rabble trying to rise above themselves. We've got to keep them in; their places, you know, Fallows. That was what went wrong with the Old Order. It let them climb too high, and they took over. And what happened? They dragged it down--civilization.

Do you want to see that happen again?" "Better late than never, I suppose," another commented, glancing at the painter, who was still there. The painter nodded but didn't reply..blurred, and she heard vintage feeling wash through her words. "I could hope . . . one day I might be.product secrets in return for a suitcase full of cash. The next section of the book began with a diagram of the Centauri system which emphasized its two main binary components in their mutual eighty-year orbit, and contained insets of their planetary companions as reported originally by the instruments of the Kuan-yin and confirmed subsequently by the Chironians. Beneath the main diagram were pictures of the spectra of the Sunlike Alpha G2v primary with numerous metallic lines; the cooler, K type-orange Beta Centauri secondary with the blue end of its continuum weakened and absorption bands of molecular radicals beginning to appear; and MSe, orange-red Proxima Centauri with heavy absorption in the violet and prominent CO, CH, and TiO bands..The dog follows at his heels..Even his compliment fails to pump the air back into her deflated smile. The way to obtain antimatter, they therefore reasoned, would be to make a small part of the universe look like an antiuniverse so that tweedlespace could be "fooled" into projecting antitweedles instead of tweedles into it.
